PROFESSIONAL SUMMARY

IIT Madras B.S. graduate in Data Science and Applications (CGPA 8.9/10), with experience contributing to agentic AI tools and machine-learning solutions. Google Summer of Code 2025 contributor who builds practical NLP, analytics, and full-stack data applications using Python and modern web technologies.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript / TypeScript, Java **ML / NLP:** scikit-learn, NLTK, TF-IDF, Logistic Regression, text classification

Data: Pandas, NumPy, Matplotlib, Power BI **Development:** FastAPI, React, Next.js, Flask, Streamlit, REST APIs, OAuth / JWT

Tools: Git, GitHub, Docker, SQLite, web scraping **AI applications:** LLM API integration, natural-language and voice-based data interaction

EXPERIENCE

AI Engineer Intern
Onion Information Security Solutions Pvt. Ltd. | Mumbai | Apr 2026 - Sep 2026

- Contributed to the development of agentic AI tools and supported machine-learning models within the technical team.
- Assisted with the design, testing, and documentation of AI/ML solutions and collaborated on project deliverables.

Google Summer of Code Contributor
Open-source program | 2025

- Contributed to open-source AI and data tooling, including data-pipeline components and AI-tooling integrations.

AI / Data Science Collaborator
Contract project | Remote | 2024

- Built ML-powered data tools and automated pipelines with third-party API integrations; delivered interactive dashboards and model insights.

SELECTED PROJECTS

AnalystGPT | Next.js, FastAPI, Python, React

- Built a full-stack data-analysis platform for natural-language and voice queries over uploaded datasets; added data cleaning, comparisons, ML predictions, interactive charts, and PDF reports.
- Implemented Google, GitHub, and email authentication, plus saved dashboards.

Fake News Detector | Python, NLTK, TF-IDF, Logistic Regression, Streamlit

- Developed a news-text classification app with preprocessing, TF-IDF features, and related-news API lookup; positioned results as screening signals rather than definitive fact checks.

Judgment Bias Detector | Python, NLTK, scikit-learn, Streamlit

- Created an educational NLP application to explore patterns in sample court-judgment text and visualize model outputs; not intended to provide legal conclusions.

Workforce Analytics Predictive Model | Python, HR analytics

- Explored workforce-data patterns with predictive machine learning to support planning; emphasized validation, privacy, fairness, and human review.

Also built: Netflix EDA dashboard (Streamlit); Court Data Fetcher and mini dashboard (Flask, SQLite, APIs); responsive Salem English School website concept (UI/UX).

EDUCATION & LEADERSHIP

B.S. in Data Science and Applications | Indian Institute of Technology Madras | Completed Jun 2026 | CGPA 8.9/10

Diploma in Programming | Indian Institute of Technology Madras | Expected Jun 2027

Webinar Host & Moderator | HR Samvaad: People Management & HR Analytics | Hosted a discussion with Mr. Rajat Mendiratta for 200+ HR leaders.
